

## CustomFit Prosthetic Cover

UNYQ CustomFit Covers, our custom-shaped prosthetic covers for lower limb amputees, offer your patient a new and **creative level of personalization** for their prosthesis, as well as being easy and convenient for you to order.

Using advanced 3D printing technologies, UNYQ covers **mimics the shape** of your patient's sound limb anatomy and works with all prosthetic components.

You can have them made in Polyamide (3D Firm) or TPA (3D Flex) depending on **how active** the patient is.

These covers are very light, most of them weigh **less than 500grams**.

- **CUSTOM SHAPE** FOR EACH USER AND PROSTHESIS
- **PHOTOS & MEASUREMENTS** REQUIRED
- **ORDERING** THROUGH **UNYQ APP** OR **WEBSITE**
- AVAILABLE FOR **AK** AND **BK** PROSTHESIS

# UNYQ<sup>®</sup> CustomFit

## 100% CUSTOMIZED!!

## 3D Flex

TPA or Thermoplastic Polyurethane is a kind of plastic used as a replacement for hard rubber. It's **extremely flexible**, durable and smooth to the touch. It allows to design **lightweight covers** with a more durable performance, which suits best the **more active** users. After printing, each cover is hand polished and painted with a high quality finishing.

**FLEXIBLE**    **LIGHTWEIGHT**    **ACTIVE**

Flex CustomFit Covers available in designs: *Trooper, Athlon, Brizz, Herringbone, Kai, Odyssey, U, Next, Natura and Galaxy.*

## 3D Firm

Polyamide (PA 12) is a thermoplastic material with great mechanical characteristics, which makes it ideal to create resistant and **complex pieces**. It allows to design lightweight covers with a more **detailed surface**, which makes the difference in our UNYQ Covers. After printing, each cover is hand polished and painted with a high quality finishing.
